MAKE YOUR OWN BOMB POP MEMORY GAME
Then play it with your friends!

Instructions

1. Using scissors, cut each memory card out along the dotted lines. Be sure to cut all of the cards out from BOTH sheets.

   IMPORTANT: Only cut along DOTTED lines. Do NOT cut along solid lines.

2. Fold each memory card IN HALF along the line that says "FOLD HERE."

3. Use tape, glue or a glue stick to fasten the front and back of each card together.
To play the game, first lay all of the cards out FACE DOWN in front of you with the Bomb Pop logo facing up. You should have TWENTY total cards from both sheets. Begin by selecting one card to turn over. Look at the image on the back of the card, and then select another card from the group to see if you've found a match. If you find a match on your first try, then remove the matching cards from the group and set them aside. If the cards do not match, turn them over and place them back where they were originally. It helps to remember the images and the locations of the cards so that you can match them up with other cards later in the game. Try to see how few turns you need to remove all of the cards. You can play Bomb Pop Memory by yourself, or with a friend in turns. The winner is the one with the most matching cards at the end of the game.
